Level 3 — Hard (H) Factors — Numbers

✓ Submitted

Write a program to print number of factors and to print nth factor of the given number.

Sample Input:

Given Number: 100

N = 4

Sample Output:

Number of factors = 9

4th factor of 100 = 5

Testcase: 1. Given Number = 512 , N = 6

2. Given Number = 343 , N = 7

3. Given Number = 1024 , N = 0

4. Given Number = -6561 , N = 3

5. Given Number = 0 , N = 2

Your Code

```
1 import java.util.Scanner;
2 class Main{
3     public static void main(String[] args){
4         Scanner sc = new Scanner(System.in);
5         int a = sc.nextInt();
6         int n = sc.nextInt();
7         int count=0;
8         int factor=0;
9         if(a<0)
10             a=-a;
11         for(int i=1;i<=a;i++){
12             if(a%i==0){
13
14                 count++;
15                 if(count==n)
16                     factor=i;
17             }
18         }
```

Output

```
Number of factors = 9
4th factor of 100 = 5
```

```
19     }  
20     System.out.println("Number of factors = "+count);  
21     System.out.println(n+"th factor of 100 = "+factor)  
22  
23     }  
24 }
```
